	CMT 206s	Construction Estimating	3
	MST 111 or MST 215	Elements of Supervision Small Business Management	3
	CIS 146	Microcomputer Applications	3
	CMT 102	Construction Blueprint Reading	3

CERTIFICATE

The certificate program covers the fundamentals of construction principles and applications. The graduate can apply skills obtained in Estimating, Blueprint Reading, Construction Methods, Management, and Codes in jobs related to the construction industry.

ASSOCIATES

This program covers construction principles and applications enabling the graduate to work in the construction industry in a supervisory or management position.

All course work in the certificate program will apply to the Associate of Science degree program.

			TOTAL 26

CERTIFICATE

The certificate program covers the fundamentals of manual and computer aided drafting (CAD) enabling the graduate to apply these skills in jobs related to architecture and civil technologies.

ASSOCIATES

This program covers architectural principles and applications enabling the graduate to work as a technician or assistant to an engineer, architect, or builder in architectural design, drafting, surveying, structural design, and structural detailing.

The Road to Success is always

Lily Tomlin

The program covers the building process from conceptual design to the structures final completion. Students will learn drafting and scheduling software, estimating as well as practical skills used in all construction settings.

The Construction Management Program is accredited by the American Council for Construction Education (ACCE).
